Subject: SAMPLE CONTAINERS

Glenn, Can you please help get together the supplies for sampling the drinking water wells in the Domingo area of Santo Domingo.

Can you please check our inventory in the basement for the following containers and quantities. If we have all these then lets set them aside in a place in the basement and tag them for this upcoming sampling event. If we do not have these in stock, let me know so we can order them asap. Thanks.

CONTAINER

QUANTITY

One gallon glass jugs, ambar color

eleven

- 7 jugs gallon

3202
~~8~~ ambar

40 ml, VOA vials

twenty (please check and note if the vials are pre-preserved or not)
